EDWARD WILLIAMS, Esq.

ALGERNON THOMAS BRINSLEY SHERIDAN, Esq.

GEORGE EDWARD ELIOT, Esq.

JOHN MONTAGU PULTENEY MONTAGU, Esq.

OF THE

COMMITTEE OF VISITING JUSTICES,

FOR THE YEAR 1885.

THE number of Patients in the two County Asylums continues nearly stationary. At the end of the year 1884 the total was 471; it is now—December 31st, 1885—472. This number is made up of 425 county paupers, 195 being males and 230 females; 19 Out-County patients, 9 being males and 10 females, belonging to the Town and County of Poole; and 28 Non-paupers, 16 being males and 12 females. This shows a reduction of 4 County pauper patients, an increase of 3 Out-County, and 3 Non-paupers; there having been 1 patient confined at the end of 1884 under the Secretary of State's warrant. In the pauper class there have been 65 admitted, 33 have been discharged, of whom 22 were recovered, 9 relieved, and 2 not improved. The number of re-admissions is large, that of recoveries in proportion to admissions not quite so good as last year, but still not unsatisfactory, being 33½ per cent. There have been 34 deaths—a little over 7 per cent. on the average number of inmates; though 1½ per cent. above that of last year, still a low rate of mortality for lunatic asylums.

The health of the patients generally has been good. On some of our visits we have found not one confined to bed by illness. There have been several rather bad fractures, and one patient died from suffocation by choking. On enquiry we were satisfied there was no want of care and attention.

No structural additions or improvements have been made during the year, except the building of two cottages for occupation by two of the married servants at an expense of about £400, and the works for the purification of the sewage, the cost of which has been about £200—the outlay in both cases being defrayed from the Non-paupers' Surplus Fund.

In regard to the Officers the Visitors have only to record, as they have done now for so many years, their high sense of the value of the service rendered to the county and to the patients under his care by the Medical Superintendent of the two Asylums. He speaks with gratitude of the ready zeal and kind aid given him by his two Medical Assistants-Mr. Macdonald and Mr. Davisand the Visitors fully concur in the acknowledgment of the efficient manner in which their duties have been performed. Chaplain continues in the discharge of his important office to the entire satisfaction of the Visitors. The Head Attendant on the male side has been in his present employment for some years, which he fills with efficiency. The Matron, Prudence Dewey retired in June last on a pension mentioned in the last Annual Report, after a service of 37 years. Her assistant, Mrs Keegan, succeeded her in that office, but, her health having given way, she is now absent on leave in the hope that change and rest may promote her recovery. A new Matron, Miss Spencer, from a private Asylum near London, has been appointed at the Forston Asylum in the place of Mrs. Murrant, who left at the end of the last quarter. The Visitors are always glad when they can report, as they are able now to do, that there have been few changes among the attendants and servants, and that with very few exceptions they have conducted themselves well and with kindness and consideration for the patients under their care.

In consequence of communications received from the Local Government Board, the Visitors made enquiries of the several Boards of Guardians in the County as to their ability to make proper provision for the reception into their workhouses of certain harmless patients now confined in the Asylums. Favourable answers having been returned by some of the Boards, a few of the patients designated were removed into the workhouses of the Bridport, Sherborne, and Cerne Unions, and, as far as present experience shows, the result has been satisfactory.

The two Asylums were visited by two of the Commissioners in Lunacy on the 13th and 14th of March. They made several recommendations in regard to the arrangements and the management of the Asylums, especially as to the staff of female attendants, suggesting additions in that department. The Visitors would observe that the number of female attendants has been of late years increased, but they have, in compliance with the views of the Commissioners, added a female attendant in wards 4 and 5, making 6 attendants in those two wards; and have also employed an additional servant in the laundry, who, of course, is available for other duties if required. Another suggestion for the provision of more amusement for the patients has been to some

extent acted on by the supply of four new bagatelle boards, and rather more general entertainments this winter in the Recreation Hall. The other recommendations are receiving the attention of the Visitors. The remarks of the Commissioners as to the general condition of the patients, their food, clothing, bedding, &c., are satisfactory.

The state of the debt on mortgage of the county rate is as follows for building and furnishing the County Lunatic Asylum: —Original debt, £41,000; paid off, £38,600; remaining due, £2,400.

(Signed)

JOHN FLOYER,

Chairman.

REPORT

OF THE

COMMISSIONERS IN LUNACY.

Dorset Asylums,
March 14th, 1885.

E have yesterday and this day inspected the two Asylums at Charminster and Forston, and at the commencement of this Report we wish to call the attention of the Committee to various matters appearing to us to require consideration at their The staff of attendants is in our opinion too weak, especially on the female side; in 5 ward are 41 patients (7 being epileptic) and there were 7 patients in bed, and in 4 ward 48 patients (4 epileptics) and 4 were in bed. These two wards have a staff of 2 nurses in each, with one supernumerary dividing her time between the two wards. We think that 3 ought to be the very lowest number of nurses ever on duty in either of these wards, and there ought to be also an extra nurse engaged to supply the place of any nurse on leave for the day, sick, or absent on the annual holiday. The proportion of Attendants looks well on paper, but it must be remembered that the 27 male Attendants include artizans, and the 22 Nurses include the laundry maids, so that many of these have during the greater part of the day charge of very few patients.

Mr. Symes tells us he experiences great difficulty in getting nurses here, the wages are low commencing at £13, rising to £17, and the charge nurses begin at £17 and rise to £25. We think it would be easy if the initial wages were higher, uniform given, and means of amusement afforded when work is done, to secure the services of efficient persons. There is no doubt that this place must be dull, owing to the distance from any place of amusement, and therefore it is all the more to be desired that means of recreation within the walls should be given to the attendants. We do not approve of the principle of giving the attendants beer money, and beer to the Patients, though Mr. Symes does not think that the system has hitherto failed. We again urge the giving uniform to both Attendants and

Nurses. More books, illustrated periodicals and games might be supplied to the patients. Linoleum on the floors which are everywhere bare, except by the bedside should be laid down. chairs suitable for epileptics are required. Tell-tale clocks to test the vigilance of the night attendants are needed. The watercloset accommodation is in our opinion insufficient, as for instance in 5 ward 2 seats for 41 patients. The old fashioned beds at Forston which are really wooden boxes should be done away with, and we think some door of communication between the male and female side at the long dormitory should be made available in the event of an outbreak of fire in this place. The door should be secured so as to prevent unauthorized use, but so as to permit ready egress on emergency. It might be well if we here call attention to the remarks in previous entries that the occupation by the females of a male ward at Forston is unsatisfactory, and ought to be considered to be only a temporary expedient. was a patient at Forston in bed with a slight wound in the throat self inflicted by a knife she seized from the nurse's table at tea The constant supervision of this woman must be a heavy tax upon the limited staff, and we think it may demonstrate the real weakness of the staff if we briefly show here the patients and In 2, 3, 4, 5 wards at nurses as we saw them yesterday. Charminster are 146 patients—23 epileptics and 18 in bed with 9 nurses; and at Forston 76 patients—8 in bed and 6 nurses, but one patient as above mentioned requiring the service of one We noticed that the knives were in open boxes, and we think they ought never to be kept except in boxes under spring lock. During our inspection of the Asylum we have seen every patient, and afforded every one opportunity of making known their complaints but none calling for remark were brought before us, and we had no charge of rough usage or illtreatment, The dress of the patients does not call for unfavourable comment, but the women's gowns were getting old and worn. We hear that the male patients, not working, have still only the one shirt a week for night and day, and we hope a second will be furnished. We saw an excellent meat dinner with two vegetables on the table which was much liked by all, but the beer should not, as we think be poured out before the patients are seated and the dinner The day rooms were very clean, and the ventilation was The beds were properly supplied with under blankets and were in good order. The patients were quiet and well behaved, and we think that the general state of the wards is creditable to the attendants on either side. The only structural alterations or additions we have to notice are the completion of the filtering tanks at Forston, and the new engine house which is part begun. Associated entertainments are held at Charminster weekly, and are attended by about 130 patients, and at Forston fortnightly,

when about 30 are present. The Church Services at the former place are joined in by 114 and at the latter by 29 patients. patients usefully employed are 93 males and 126 females, 38 of the men and 34 of the women being employed in the wards. Since the last visit 8 men and 6 women have died from causes ordinary in Asylum, and we need only notice that it has been found possible to make post-mortem examinations in 12 of the cases. No Coroner's inquest was held. Under medical treatment last week are registered 9 men and 20 women. Eleven men were seen by us in bed when we passed through the wards, and 25 men are returned as epileptics, 22 of whom we may note are in 2 ward where are placed 27 patients, 4 in bed, with 2 attendants. Seclusion has been recorded in the case of 2 men once each for a total of 18 hours, and of 6 women 8 times and for 58 hours in all. Violence being the reason assigned in every case, but we ought not to omit to say that outside some of the single rooms was a chain placed, which we saw in use yesterday, and though this is not considered seclusion it keeps the patient effectually within the room and seems to us to come under the denomination of enforced isolation, i. e., seclusion. Restraint has been required for "surgical reasons" for two men and one woman for 24 and 36 hours respectively. The changes which have taken place since the last visit have been the admission of 30 paupers—16 men and 14 women, and of 7 private patients 5 men and 2 women. The discharge of 24 patients, 9 male pauper, 2 private female, and 13 pauper female patients. Four males and 12 females all pauper patients had recovered. On the books this day there are 330 at Charminster and 139 at Forston, 17 male private, and 8 female private patients are at the former, and 1 male and 3 female private patients at the latter Asylum. The pauper males are at Charminster 137, and at Forston 62, whilst 168 and 73 respectively are the number of female pauper patients under care and treatment in these Asylums.

W. E. FRERE, Commissioners W. RHYS-WILLIAMS, in Lunacy.

CHAPLAIN'S REPORT.

THE Chaplain has the honour to present his Report for the last year.

The Sunday and Weekday Services in the Chapels of the two Asylums have been conducted with regularity as heretofore. On Sundays there has been a Morning Service and an Evening Service held alternately at each of the Asylums; and an Evening Service at each Asylum on one Weekday. Morning Prayer is read Daily by the Chaplain at the Forston Asylum.

The Holy Communion has been celebrated every month according to custom. The attendance at this service is not large, and the Chaplain regrets that so few of the Attendants and Nurses avail themselves of the privilege. The collections at the Offertory are applied to the increase of the "Charity Fund."

The Chaplain has visited the wards regularly for the purpose of talking to the Patients, and reading to them the Holy Scriptures and other suitable books.

The Burial Service has been performed twenty-four times during the twelvemonth in the Cemetery of the Asylum.

F. C. CARDEW, Chaplain.

January, 1886.

ANNUAL REPORT

OF THE

MEDICAL SUPERINTENDENT.

To the Chairman and Visitors of the Dorset County Asylum.

Another year having passed, it again becomes my duty to lay before you a short statement of the Asylums and Inmates with the usual Statistical Tables appended.

On the 1st of January, 1885, there were in the two Asylums 471 Patients—217 male and 254 female—of these 14 males and 11 females were non-paupers, and 10 males and 9 females belonged to the Town and County of Poole.

The Admissions during the past year were 73—32 males and 33 females were paupers, and 6 men and 2 women non-paupers. Attention has so frequently been called to the ofttimes very unsatisfactory state of the general bodily health and condition of those admitted, that I would only remark that little or no improvement can be reported. Table 14 gives more particulars.

The Discharges were 37--of whom recovered were 12 males and 12 females; relieved 5 males and 6 females, and 2 males not improved.

The Deaths during the year were 16 males and 19 females—being a percentage of 7.4 on the daily average number resident—rather higher than last year, yet much below the general average of Asylums. A reference to Table 8 will show the ages of those that died—10 being from 30 to 50 years of age, 10 from 55 to 65, 10 from 65 to 75, and 5 averaged 81 years.

The general health of the patients has been fairly satisfactory, and no epidemic or general disease prevailed. Notice has been sent according to Statute to the Coroner in every case of death. No inquest was considered necessary.

The Accidents have been more than for many years past-fortunately none were very serious, although some of them were a source of considerable trouble in nursing, but eventually all ended satisfactorily. Three were cases of fracture of the arm--one of collar bone, and one of both bones of the leg--the results of pure accident, and those in charge were not to be blamed.

The Maintenance rate has been the same throughout the year 8s. 2d. per week, but I think there is a reasonable chance of its being slightly lower, as meat and provisions are certainly cheaper.

The general routine of the Asylum work, amusements and occupations have continued much as in former years, very little change having taken place.

My two Assistant Medical Officers, Mr. Macdonald and Mr. Davis both remain. The former gives me most efficient and satisfactory help in all my varied duties and anxieties, more particularly when, as has been the case several times during the year, I have been compelled from indifferent health to take less than my usual share of work, and it was a source of real pleasure to me, when you, at my recommendation, materially added to his salary, thus giving your sanction and approval to my opinion. All the Statistical Tables have been carefully drawn up by himawork of considerable labor and trouble.

Mr. Davis who takes charge of the Old Asylum at Forston, continues to be a good and energetic officer, and relieves me of much trouble by his general care and management of the Asylum. Miss Spencer who was elected Matron for Forston in July last, bids fair to be a useful and efficient officer, she has much to learn, but as she gives her attention well to her duties, I trust she will prove year by year to be more valuable.

Our good old Matron, Mrs. Dewey, left the Asylum in June last, greatly to the regret of all. I know no one who did not deeply feel the separation. A few days before she left a most cheery and happy gathering took place in the Recreation Hall. The Medical Superintendent, his wife and family, the Assistant Medical Officers, and every Attendant, Nurse, and Servant, with three exceptions, all joining in giving her a Testimonial, accompanied by an address with signatures attached. Many happy and appropriate remarks were made, and the evening was spent very joyously, music with glees and songs and a good supper completed the entertainment. This was one of the few bright spots in the general routine of our Asylum life.

Mrs. Keegan, the Assistant Matron, whom you appointed to succeed Mrs. Dewey, carried on the duties very satisfactorily for some time, but her health soon gave way, and she was compelled to leave for change, and has not yet been able to return, I fear her health is worse than at first was anticipated.

There have been very few changes amongst the Attendants, Nurses, and Servants, and it is always a great pleasure to be able to testify in their favour, for without doubt they have, especially at times, arduous and difficult duties to perform. Some few black sheep there are in almost every flock, fortunately I have only had one or two instances of serious misconduct to report, and these did not in any way affect the Patients.

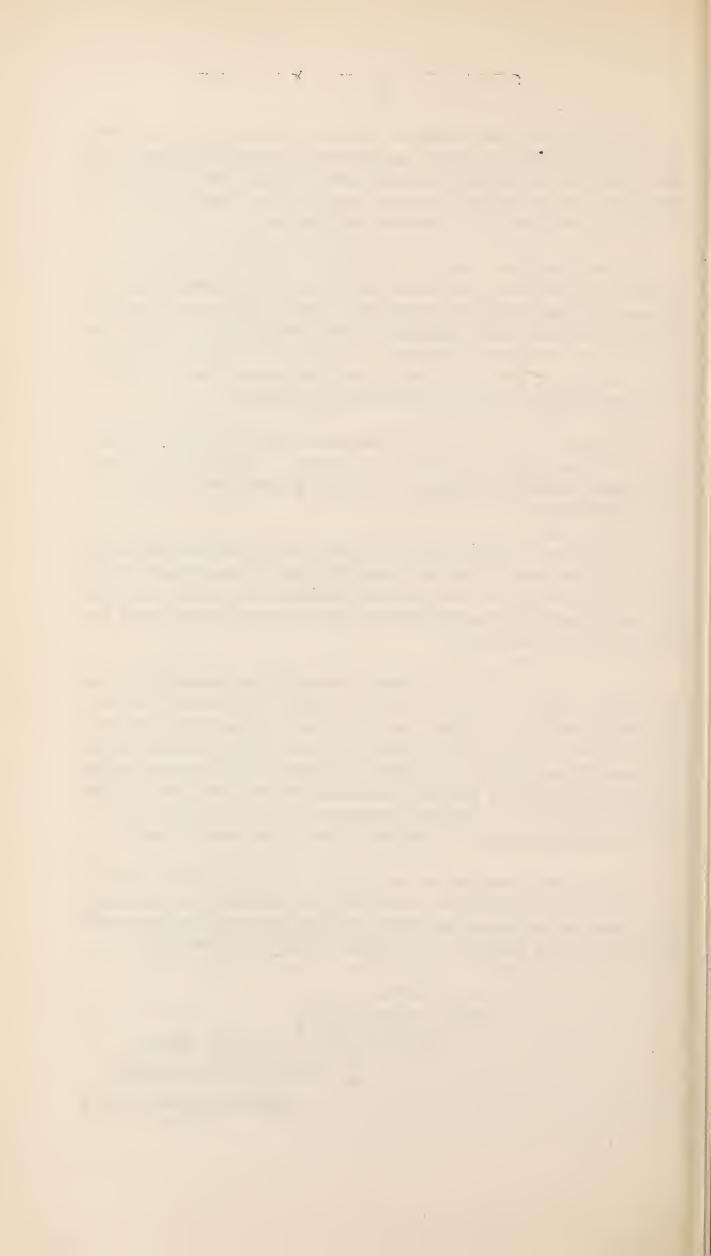

Thomas Cake, the Night Watchman, was obliged to give up his work after being here nearly 20 years. His health for some time past had been failing. He was a good and industrious Night Attendant.

The general work on the Farm has progressed satisfactorily. The stock has been far better managed and we have had a much more liberal supply of meat, and in addition have sold more than for many years past—a evidence of the care and attention of the Stock and Meat Manager.

For a long period I have pleasurably acknowledged the gratuitous supply of Papers from the several Proprietors—namely, Western Gazette (2 copies), and one each from the Sherborne Journal, Dorset County Chronicle, Weymouth Post, Dorset County Express, Poole Herald, and Dorset Telegram, all these continue to be sent regularly; in addition to the above many of the London Daily, Weekly, and Comic Papers are taken, all combining to amuse and keep us well up in the affairs of the outside world.

It now only remains for me again to thank you most heartily for all your great kindness and courteous consideration, lessening as it does my cares and troubles, and adding spirit to my work. Trusting I may always prove myself worthy and grateful,

I am,
With sincere respect,
Your faithful and obliged Servant,
J. GUSTAVUS SYMES,
Medical Superintendent.

DIETARY.

BREAKFAST.

Males.—6ozs. bread, 1 quart gruel—daily. Females.—5ozs. bread, $1\frac{1}{2}$ pint gruel—daily.

SUPPER.

MALES.—8ozs. bread, 2ozs. cheese, or $\frac{1}{2}$ oz. butter; 1 pint tea or coffee—daily.

FEMALES.—6ozs. bread, 2ozs. cheese, or ½oz. butter; 1 pint

tea or coffee—daily.

DINNER.

Sunday.—16 to 18ozs, suet pudding, with treacle sauce, and the addition of fruit in summer, and dried fruit in winter.—

Mules and Females.

Monday.—3ozs. meat, vegetables not less than 1lb.—Males and Females.

Tuesday.—50zs. meat, vegetables as on Monday.

Wednesday.—2 pints soup, 202s. meat, 502s. bread—Males. 1½ pint soup, 402s. bread—Females.

THURSDAY - Meat pie, 12ozs. - Mules; 10ozs. - Females.

Vegetables as on Monday.

FRIDAY.—50zs. meat, vegetables as on Monday.

SATURDAY .- As on Monday.

Half-pint of ale daily for dinner, except on Wednesday, both Males and Females.

Women working in laundry have tea and bread and butter twice a day extra on three washing days, and once a day on three ironing days; also bread and cheese and $\frac{1}{2}$ pint of ale for lunch.

Women scrubbing in wards have bread and cheese daily for

lunch, with $\frac{1}{2}$ pint of ale. Men the same.

Men working in shops or on the farm have \(\frac{1}{2} \) pint ale extra at eleven and four o'clock.

Sick Diet as considered necessary by the Medical Superintendent.

Tobacco and Snuff distributed as directed.

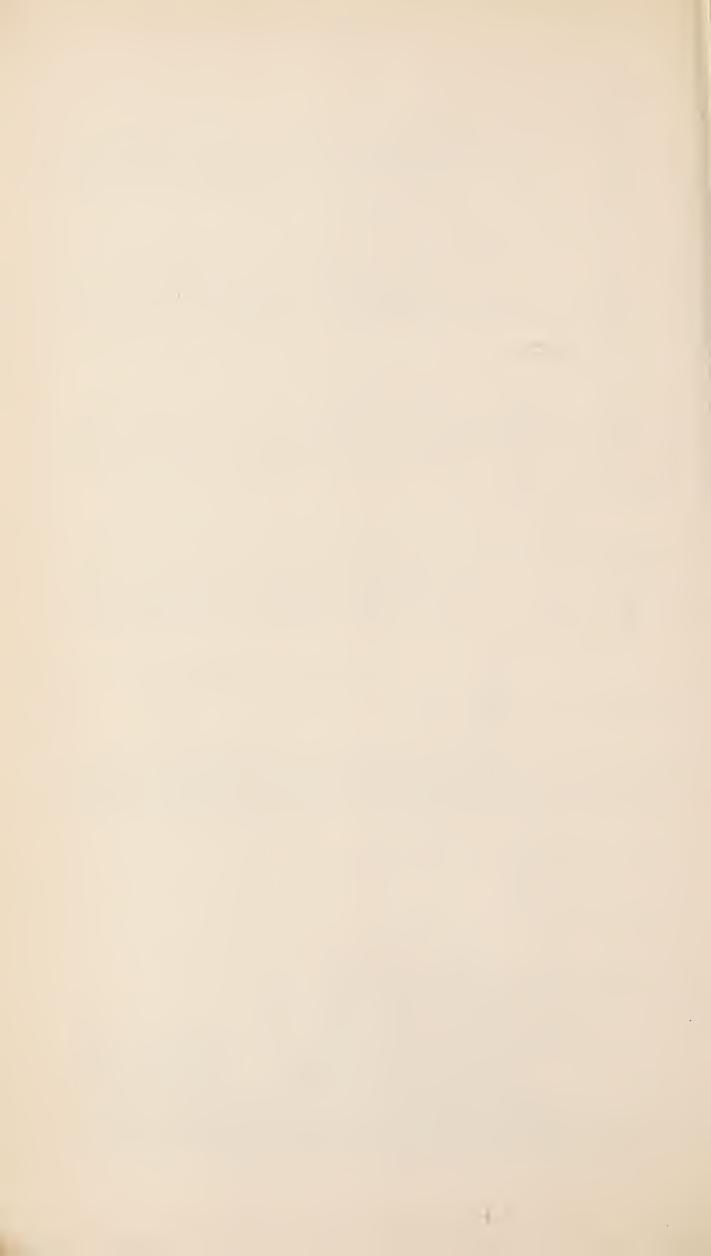

Attendants and Nurses are all allowed 7lb. bread, $\frac{1}{2}$ lb. butter, $2\frac{1}{2}$ ozs. tea, and 8ozs. sugar weekly—in addition they dine in the Servants' Hall, without restriction as to quantity of meat, vegetables, &c., and for supper bread and cheese, ad libitum. Males—2 pints ale. Females—1 pint daily.

N.B.—" All meat is weighed after being cooked, and free from bone."

The Milk Gruel is made with the best oatmeal and milk. Meat Pie contains Sozs, of ment without bone. Soup is made from liquor of boiled meat, thickened with Pearl Barley, Rice, Pea Meal, to which are added Vegetables, Herbs, &c. Fish for Dinner once a fortnight,
